 - Apply it when YOU want
 - Apply it how YOU want
- o Compatible with common spraying equipment
- o Easy to clean up - just rinse with water
- o Economical
- o Made from renewable resources, & is biodegradable!

Frequently Asked Questions

What is SoyFlex™?

- o SoyFlex™ Dust Suppressant is an effective solution for dust control formulated with soy oil and surfactants which are biodegradable.

Can I apply SoyFlex™ myself?

- o Absolutely – it is very user-friendly to measure, mix, apply and clean-up. It works with all of your everyday spraying equipment.

Where can I use SoyFlex™?

- o SoyFlex™ can be used anywhere aggregate dust is a problem. SoyFlex™ can be used on roads and driveways, alleys, school and municipal parking lots, commercial work zones, construction sites, etc.

How does it work?

- o In sufficient concentration SoyFlex™ works by reacting with the dust to form a solid water resistant surface.

Is special equipment necessary?

- o No - a common sprayer is used for application (i.e. hand-held, ATV, truck-mounted, etc.) Layers applied in thin, even coats yield better results than flooding the surface.

How long does it last?

- o Duration depends upon several variables (i.e. application rate, traffic volume, weather conditions, etc.), however SoyFlex™ typically lasts between three to four months and can be easily reapplied as desired.

How do I clean up?

- o Use water, soap is optional, and flush sprayer.
